

Makram Boukaiz

UI and motion design specialist

Morocco • 696378094

makramboukaiz@gmail.com

Profile

I am a UI/UX and motion design specialist with hands-on experience in designing intuitive, user-focused digital interfaces. I work primarily with Figma, HTML, and motion to create clean wireframes, interactive prototypes, and smooth UI animations that enhance user experience. With a background in front-end development and visual design, I collaborate easily with cross-functional teams and adapt designs based on user feedback and technical constraints. I've contributed to real products and startups, including MediTech-style platforms, and I'm eager to grow further while delivering accessible, well-structured experiences for diverse users.

Accomplishments

- Independently designed and fully developed **TailorResumeAI.com**, an end-to-end SaaS product, handling UI/UX design, front-end development, user flows, and overall product experience.
- Co-founded and contributed to **Enprico.com**, designing and building user interfaces, improving user journeys, and supporting the platform's growth through clean, accessible UI/UX.
- Designed and developed **TaskMaverick.com**, focusing on structured layouts, usability, and responsive front-end implementation.
- Created wireframes, interactive prototypes, and design systems using Figma and HTML, integrating motion and UI animations to enhance clarity and engagement.

Professional Experience

OMC, Inc, Beverly Hills, Mar 2025 to Present **Lead UI Motion Designer and creative technologist**

Lead the motion design department, managing workflows and mentoring designers. Design UI animations, Lotties, 3D visuals, and marketing assets to enhance the product's look and feel. Collaborate closely with the engineering team on product development and feature implementation. Build and maintain taskmaverick.com, including front-end coding, backend integration, and motion design implementation. Apply strong software engineering foundation (C/C++, Computer Engineering) to bridge design and development needs. Occasionally create 3D assets for ads and visual enhancements. Multi-disciplinary: motion design, web development, backend integration, 3D. Cross-functional collaboration between design and engineering. Hands-on technical expertise combined with creative direction.

ASSOCIATION OF ISLAMIC CHARITABLE PROJECTS, Philadelphia, Mar 2024 to Sept 2024 **Lead Motion Designer**

Produced 50+ motion design projects, ranging from Lotties to full motion design videos. Designed and animated assets using After Effects, Rive, and Figma. Led the motion design process, ensuring high-quality, engaging visuals for various campaigns. Strong expertise in motion graphics for both UI

animations and full-length videos. Ability to deliver multiple projects efficiently without compromising quality. Combines creative direction with technical execution.

Enprico.com, Jan 2025 to Present
Founder

Full-stack development: Built the sign-up flow, dashboard, backend, and frontend from scratch. UI/UX design: Created wireframes and high-fidelity designs in Figma. Motion & visual design: Produced animations in Blender and motion graphics for promotional ads using After Effects. Marketing visuals: Designed promotional content that communicates product features effectively. End-to-end product development: design, animation, and coding. Strong UI/UX sensibility combined with motion design expertise. Ability to translate complex ideas into polished, interactive digital experiences.

ATLAS SECRET, Aug 2024 to Present
Lead 3D Artist

Motion graphics & 3D design: Created eye-catching social media ads using Blender and After Effects. UI/UX design: Designed website interfaces in Figma. Website development: Built and maintained the Atlas Secret website from scratch. Combines 3D artistry, motion design, and web development for cohesive branding. Skilled in translating marketing concepts into visually engaging digital content. End-to-end project execution: from concept to live web implementation.

Freelancer.com, Sept 2020 to Present
Freelance Video Editor & Motion Designer

Developed and executed project plans that optimized workflow and met project goals using After Effects. Collaborated with clients to conceptualize and deliver visually compelling video content, elevating brand narratives and enhancing viewer engagement through innovative storytelling techniques. Customized animations and effects to align with client branding, enhancing overall brand identity and consistency.

Intellcap SARL, Apr 2022 to Jul 2022
Junior Software Engineer

Developed an interactive e-learning platform, integrating motion design to enhance user engagement and interface dynamics. Implemented UI animations and transitions using design tools and front-end code, improving usability and visual appeal. Collaborated with the team to design intuitive workflows, ensuring smooth navigation and learning experience. Optimized front-end components for performance while maintaining high-quality motion effects. Translated motion design concepts into functional web features, bridging design and engineering effectively. Designed UI animations for e-learning platform, increasing user engagement by 25% in beta testing.

Education

1337 Coding School

Software engineer, 2025

Institut Spécialisé de Technologie Appliquée

Associate, 2022

Minor in Computer Science
